

Des Moines Water Works Energy Policy

Des Moines Water Works is a regional utility that protects public health by delivering quality water in reliable quantities. Operating with fiscal discipline and environmental awareness, DMWW offers dynamic and responsive services that provide high value to our customers.

Des Moines Water Works is committed to continual improvement in its energy performance by using energy in the most cost-effective, efficient, and environmentally responsible way possible. To achieve this we are committed to:

- Improving energy performance by implementing an effective energy management system that supports all operations and customer satisfaction
- Measuring and continuously endeavoring to reduce energy consumption
- Purchasing energy efficient products and services
- Complying with applicable legal and other requirements related to energy use, consumption, and efficiency
- Considering energy performance in long-term planning, engineering design, and modifications to facilities, equipment, systems, and processes
- Providing the resources and information needed to set and achieve the energy objectives and targets with regular review
- Advocating for energy performance through efforts to educate, engage and raise awareness about energy performance improvement across stakeholder groups including agencies, non-governmental organizations, utilities, and policymakers
