I would like to see fluoridation ending in Des Moines, the following links prove my point.

“Mercury and Fluoride – The Dumbing Down of A Population”. Link: [http://tr.youtube.com/watch?v=e3ARhMPVu-A](http://tr.youtube.com/watch?v=e3ARhMPVu-A) Why is America so brainwashed by the corporate media? Why do we care more about American Idol and sports games than being poisoned with mercury in our vaccinations and sodium fluoride in our water supply? America needs to wake up and get the facts about our chemical manipulation before it’s too late

Dr. Russell Blaylock M.D. is a retired neurosurgeon and author whose trailblazing research has tirelessly documented the fact that there is an epidemic of neurological disorders in the western world which are directly connected to toxins in our environment, and how this relates to the larger global eugenics program behind population reduction. In this fascinating interview, Blaylock reveals how depopulation programs forged by the Rockefeller foundation in association with the Nazis were the basis of modern day incarnations of eugenics like fluoride poisoning and vaccinations.

Blaylock explains how the eugenics movement began in America through Rockefeller, Ford and Carnegie funding and what originated as The Science of Man project, which was an effort to socially engineer humanity to weed out those deemed "undesirable" to the elite. Rockefeller funding via major universities then bankrolled eugenics programs for the next several years, information about which was gleaned and exchanged with the Nazis in Hitler’s Germany. Once eugenics had attracted the negative connotations of racial superiority and genocide, the pseudo-science was reborn under the umbrella of molecular biology and DNA.

The goal is to alter behavior by chemically changing the way in which the brain functions. One of the primary methods through which this is achieved is by fluoridating water and food supplies. Blaylock explains how fluoride opportunists seized upon falls in dental cavities, which were occurring naturally as a result of increased calcium intake and better diets in the west, to claim that mass fluoridation was the answer, while burying a plethora of studies that proved adding fluoride to water did not reduce cavities at all and in fact in several instances increased dental cavities.

Alex welcomes to the show Joseph Mercola, an osteopathic physician, health activist, and entrepreneur. Mercola criticizes many of the practices of mainstream medicine and the Food and Drug Administration, particularly vaccination and the use of prescription drugs and surgery to treat diseases. He encourages using water filters to purify drinking water and is strongly opposed to water fluoridation.
